SUMMARY

AI Automation Tech Lead and full-stack engineer with 7+ years building production systems across government, enterprise consulting, and product engineering. Architects and ships agentic AI workflows using n8n, OpenAI, and Gemini for LLM orchestration, cutting manual processing time up to 60% across 15+ production automations. Pairs deep automation expertise with full-stack (React, Node.js, TypeScript) and cloud engineering (AWS, serverless, Terraform IaC, CI/CD) to deliver end-to-end. Leads engineering teams on Agile sprint delivery, owning the full lifecycle from client discovery to production deployment.

CORE COMPETENCIES

AI Automation & LLM Orchestration: n8n, agentic workflows, workflow orchestration, prompt engineering, RAG, LLM data pipelines, OpenAI (GPT-4), Gemini API, SerpAPI, Browserless.io, headless browser automation

Full-Stack Development: React, Node.js, TypeScript, JavaScript, Angular, Express, REST APIs, microservices, SQL, MongoDB, Redis

Cloud & DevOps: AWS (Lambda, SQS, S3, CloudFormation, CloudWatch, IAM), serverless, Terraform / Infrastructure as Code, CI/CD, CircleCI, GitHub, GitLab

Testing & Data: Jest, TDD, Power BI, Power Automate, Excel Office Scripts

Leadership & Delivery: Team leadership, Agile / Scrum, sprint delivery, code review, mentoring, client communication

PROFESSIONAL EXPERIENCE

AI Automation Tech Lead — AI Automation Agency

Remote | October 2025 – Present

- Architected and deployed 15+ production AI automation workflows (n8n, OpenAI, Gemini) with LLM orchestration, cutting manual processing time up to 60%.
- Built “Citation Sniper,” an end-to-end agentic pipeline (SerpAPI, Browserless.io, GPT-4) automating SEO citation discovery and competitor analysis via headless browser automation.
- Designed “ClickUp Agency OS,” an n8n integration across ClickUp, Slack, and email automating client onboarding, task management, and sprint delivery tracking.
- Led 5 engineers on sprint-based delivery, establishing code-review standards and a reusable automation template library that accelerated delivery 40%.
- Engineered AI data pipelines with headless browser automation, LLM extraction, and monitoring patterns sustaining 99%+ workflow uptime.

Senior Full Stack Developer — AS White Global

Philippines | April 2023 – September 2025

- Improved UI performance 30% by optimizing React and TypeScript components for faster load times and higher user satisfaction.
- Designed and integrated REST APIs that reduced data-transfer errors 25%.
- Delivered features up to 2 weeks ahead of schedule with product and QA teams using TDD and code reviews.
- Supported an AWS cloud migration that lowered infrastructure cost and improved scalability.
- Mentored junior developers, raising onboarding efficiency and coding standards.

Full Stack Engineer / Senior Analyst — Accenture

Manila, Philippines | July 2021 – April 2023

- Built and integrated custom backend REST APIs with frontend clients for end-to-end feature delivery, leading a team of 3 full-stack developers.
- Authored Terraform Infrastructure as Code to provision AWS services, improving deployment consistency and scalability.
- Optimized CI/CD pipelines, reducing release-cycle times.

- Automated data retrieval and reporting with Power BI, Excel Office Scripts, and Power Automate for stakeholder visibility; earned AWS Certified Cloud Practitioner during tenure.

Science Research Specialist I (Web Developer) — DOST-ASTI

NCR, Philippines | October 2018 – March 2021

- Migrated legacy government systems to modern web platforms, cutting manual processing time 35%.
- Built secure internal tools with JavaScript, Node.js, and SQL, improving data accessibility and reporting accuracy.
- Delivered technical support and enhancements that minimized downtime and increased system reliability, aligned with government compliance standards.

EDUCATION

- BS Electronics Engineering — University of the East — 2012–2017
- Full-Stack Web Development Bootcamp — Zuiitt Coding Bootcamp — 2018 (Top Performer)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Licensed Electronics Engineer (ECE)
- Electronics Technician (ECT)
